Education

Lovely Professional University, Phagwara, Punjab

B.Tech in Computer Science and Engineering

Holy Cross School, Bokaro, Jharkhand

Intermediate

Gourav Awas Uchha Vidyalaya, Bokaro, Jharkhand

Matriculation

Aug 2023 – Present

CGPA: 7.1 (Ongoing)

April 2021 – March 2022

74.6%

April 2020 – March 2021

76.8%

Technical Skills

- **Languages:** JavaScript (ES6+), C++, Python, SQL
- **Frontend:** HTML5, CSS3, Tailwind CSS, React.js, React Query
- **Backend:** Node.js, Express.js, REST APIs, JWT, BullMQ, Node-Cron, Zod, Swagger (OpenAPI)
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis
- **Cloud & DevOps:** AWS (EC2, S3, IAM, RDS, VPC), Docker, Linux, Nginx
- **CS Fundamentals:** DSA, DBMS, Object-Oriented Programming (OOP), Operating Systems, Computer Networks
- **Tools:** Git, GitHub, Postman, Prisma ORM, MongoDB Compass

Training

- **Linux Fundamentals Course – LPU** | [Certificate](#) Jun 2025 – Jul 2025
 - Learned **Linux** system administration, shell scripting, and **Nginx**-based website deployment in Linux environments.
 - Practiced server management, networking, permissions, and backend deployment concepts.
 - Gained hands-on exposure to **Docker** and Linux-based deployment workflows for backend applications.

Projects

- **InfraGuard Lite – API Monitoring & Tracking Platform** | [GitHub](#) | [Live](#) Apr 2026 – Jul 2026
(React.js, Node.js, Express.js, MongoDB, JWT, REST APIs, Swagger)
 - Built a full-stack API monitoring platform using **React**, **Node.js**, **Express.js**, and **MongoDB**, enabling users to monitor multiple APIs with real-time uptime tracking, response-time analytics, and failure history.
 - Designed a scalable backend using **Repository-Service Architecture** with JWT authentication, refresh token rotation, Zod validation, centralized error handling, rate limiting, and Swagger API documentation.
 - Implemented an automated health-check scheduler using **Node-Cron** to monitor services every 5 minutes, process concurrent health checks, generate downtime/recovery alerts, and maintain **30-day monitoring history** with TTL indexes.
 - Developed an interactive dashboard featuring monitor management, uptime analytics, response-time charts, protected routes, React Query caching, and responsive UI with Tailwind CSS.
- **LibOps – Library Operations Management System** | [GitHub](#) Jun 2026 – Jul 2026
(Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, Redis, BullMQ, Swagger, Docker, AWS S3)
 - Developed a scalable Library Management System with secure JWT authentication, role-based access control, book inventory management, borrowing/return workflows, reservation queue, and fine management.
 - Designed a modular backend architecture using **Repository-Service Architecture**, PostgreSQL with Prisma ORM, Swagger API documentation, audit logging, and Docker for streamlined development and deployment.
 - Improved application performance by integrating **Redis caching**, **BullMQ** background job processing, asynchronous email notifications, and scheduled automation using Node-Cron.
 - Built production-ready features including AWS S3 file storage, PDF report generation, analytics APIs, rate limiting, and centralized error handling to ensure scalability, security, and maintainability.

Certifications

- Project Management | [Certificate](#) Apr 2026
- AWS: Zero to Hero | [Certificate](#) Apr 2026

Achievements

- Led a **4-member team** to build a Campus Hospital Management System within 36 hours at a college hackathon (Call of Code), enabling students to book OPD appointments and view digital prescriptions, managing Git workflows and task delegation, reaching the **top 10 among 80+ teams**.
- Conducted a branch hygiene workshop for **20+ juniors** on feature branching and merge conflict resolution, helping juniors adopt Git best practices and collaborate more effectively on team projects.
- Solved **250+ Data Structures and Algorithms problems** on LeetCode & CodeForces, strengthening problem-solving and algorithmic thinking.
